About Me

I am a dedicated Cyber Analyst with a strong passion for leveraging Python task automation, Linux operating systems, and SQL to enhance security and streamline processes. With a proven track record in analyzing and mitigating cyber threats, as well as a Bachelor's Degree in Software Engineering and almost 7 years of experience in the IT field, I am committed to staying up-to-date with the latest industry trends and technologies.

Projects:

1. Cyber Security: Enhanced security at Botium Toys.
2. Network Traffic Analysis: Resolved connectivity issues.
3. Network Attack Analysis: Investigated and mitigated an attack.
4. OS Hardening: Improved operating system security.
5. IP Access Control Automation: Streamlined access control management.

Courses and Certifications:

- Ethical Hacker Certification | Skill Up | [2022]
- English Literature Diploma (Richmond, 2017)
- Linux for Hackers | FreeCodeCamp | [2022]
- Google Cybersecurity Certificate Program (8-course series,
- Completed in 2024)

Additional Trainings:

- data analysis and algorithm
- cc camera systems
- hardware troubleshooting
